

GUIDE TO PROTECTING YOUR MOTOR FLEET BUSINESS IN 2025

Technology will be essential in 2025 to help fleet operators protect their drivers and cargo.

Four trends that are reshaping safety this year:

ALCOHOL INTERLOCKS

Vehicles that won't start until the driver passes a breath test. Reduces risk and gives operators control over driver safety.

IN-CAB CAMERAS

AI-powered monitoring of driver fatigue, distraction or impairment. Layered safety with dashboard footage to support claim settlements.

DRIVER TELEMATICS

Real-time data on driver behaviour and vehicle use. Spot patterns, prevent drink-driving, and support lower premiums.

IN-CAB CAMERAS

Training, simulators, and up-to-date safety policies are essential. Drink-driving prevention is as much about culture as it is technology.

WE COVER ALL TYPES OF FLEETS:

- Small family fleets
- Car/van mix fleets
- Own goods HGV fleets
- Haulage operators with HGVs
- Private & public hire fleets
- Self-drive hire fleets
